TYRE SAFETY IS ROAD SAFETY

Tyres are designed and built with great care to provide thousands of kilometers of excellent safe services. But for maximum benefit, they must be maintained regularly. Tyre is a vital factor in thousands of road traffic crashes every year. Infact previous research have indicated that over 20% of road traffic crashes are tyre related. Going by the staggering revelation, it is very important to take tyre safety issues seriously. To take care of your tyre consider the following measures.

- Check the depth of the tyre head regularly using dedicated gauge or built in head wear indicator on the tyres. The more the tread means more grip especially on wet roads. The minimum requirement is 1.6mm. Check all the four tyres, in each main groove and in at least two points along the groove.

- Check the tyre pressure. Tyre will not simply work without pressure. Check regularly and keep tyres correctly inflated at all times. The correct pressure could be found in the operating manual, under the fuel cap, on the inside of the door or in the glove compartment. Check when tyres are cold before long journey or carrying heavy loads.

- Check for damage or irregular wear. Check for any sharp object lodged in the head, any cuts, tears, cracks, or bulged on tyres. While these simple checks can be carried out by a driver, other complex checks should be carried out by competent mechanic during regular maintenance visits.

Carryout wheel alignment regularly as lack of it can lead to uneven wear and pressure related wears.

Wheel balancing is also vital as lack of doing it can lead to serious mechanical damage. When carrying out the necessary checks do not forget the spare tyre.

Look after your tyre and they will look after you.

ACM Kayode J. Fanola, mni
