SOME SAFE DRIVING TIPS DURING RAIN

We all have experience the sudden unexpected downpour of rain, the combination of strong wind, heavy rain, hail and lightening can create new hazards. Research has shown that 48% of weather related crashes are attributed to driving during rainfall. It is for this reason we need to take wet weather condition seriously when you are on the road.

The following tips can be helpful for drivers who have to face heavy rain fall on the road.

1. Begin with the simplest lifesaver; slow down when the rain start to fall.
2. Never slam the break suddenly on a wet road, because it can cause the vehicle to skid
3. Increase the three second rule to 5-6 second to maintain a safe distance from the vehicle ahead of you, there should be enough space for maneuver.
4. Ensure to check your windshield wiper to be ready for the task.
5. Be mindful of vehicles at the rear and in blind sport as it is difficult to see through rain spattered windows.
6. Always change to the lower gear before you take a sharp bend holding to the steering with both hands.
7. Ensure your lightening system is in good condition and use the dipped beam settings during rain.
8. Beware of hydroplaning when the tire is getting traction on layer of water on the road than the road itself.
